Source: National Statistics Bureau/Civil Status Office

- Notes:
- (1) Measured per thousand of mid-year population
 - (2) Deaths of Infants under one year of age per 1000 live births
 - (3) The mid-year population estimates for 1987-1993 and onwards have been rebased using the 1987 census data
 - (4) 2 persons aged 36 & 37 years who were registered in 1991 are not included in births in this table
 - (5) 2 persons aged 27 & 50 years who were registered in 1992 are not included in births in this table
 - (6) The Population has been rebased using the results of the 1994 Census results
 - (7) The population has been adjusted due to misreporting of births from Civil Status

Notes :

- (1) From 1988 onwards nurses were asked to screen only minor illnesses
- (2) Yellow Fever was started to be given at MOH Clinics for children in 1995
- (3) From 1988 onwards ante natal attendances from Victoria Hospital were included
- (4) From 1991 onwards Papsmeares and Dropouts were included
- (5) From 1994 the Mid Year Population estimates have been rebased using the 1994 Census Results (MECA Project 1995)

BAIE STE ANNE HOSPITAL

Bed Occupancy Rate = $\frac{\text{Occupied Bed Nights} \times 100}{\text{Available Bed Nights}}$

Occupied Bed Nights 2614
 Available Bed Nights 35 x 365 = 12,775
 Occupancy Rate **20.46%**

Average Length of Stay = $\frac{\text{Occupied Bed Nights}}{\text{Admissions}}$ = $\frac{2,614}{906}$

2.89 days

Throughput = $\frac{\text{Admissions per Year}}{\text{Average Available Beds}}$ = $\frac{906}{35}$

25.89 cases per bed per year

**BEDNIGHTS, ADMISSIONS AND DEATHS BY MONTHS
